

Winter EMT Blended Class

January 9th-April 27th, 2023

Course Description

The Emergency Medical Technician (EMT Basic) course is a 266-hour classroom and field-based emergency medical program. This level of education is the minimum requirement to staff and operate an emergency response vehicle (an ambulance) in the State of Michigan.

This course is approved by the Michigan Department of Health & Human Services Division of EMS. Upon successful completion, students are eligible to take the National Registry Certification test as required by the State of Michigan for licensure.

This course prepares students to enter into entry-level emergency response positions and is typically employed by private ambulance services, fire departments, and as hospital Emergency Room (ER) technicians.

Students will be evaluated in the following core competency areas: didactic, practical, clinical, and internship performance. In addition, students achieving an 78% or higher and passing the course final computer-based test, will receive a certificate of completion and be eligible for National Registry testing and State licensure.

Practical skills are graded on a pass/fail basis and students will be required to pass all practical examinations to successfully complete the program. All clinical and internship rotations are graded on attendance, attitude, and skills performance, which will be evaluated by field mentors, a clinical coordinator, and/or the course instructor.

Lab Information:

Classroom learning will be all online and labs will be in-person at our campus in Ann Arbor & Jackson
Labs are in-person and are required. The following lab is available:

- Thursdays 8 am - 3 pm (both Ann Arbor & Jackson)
